

Agentic AI Engineering

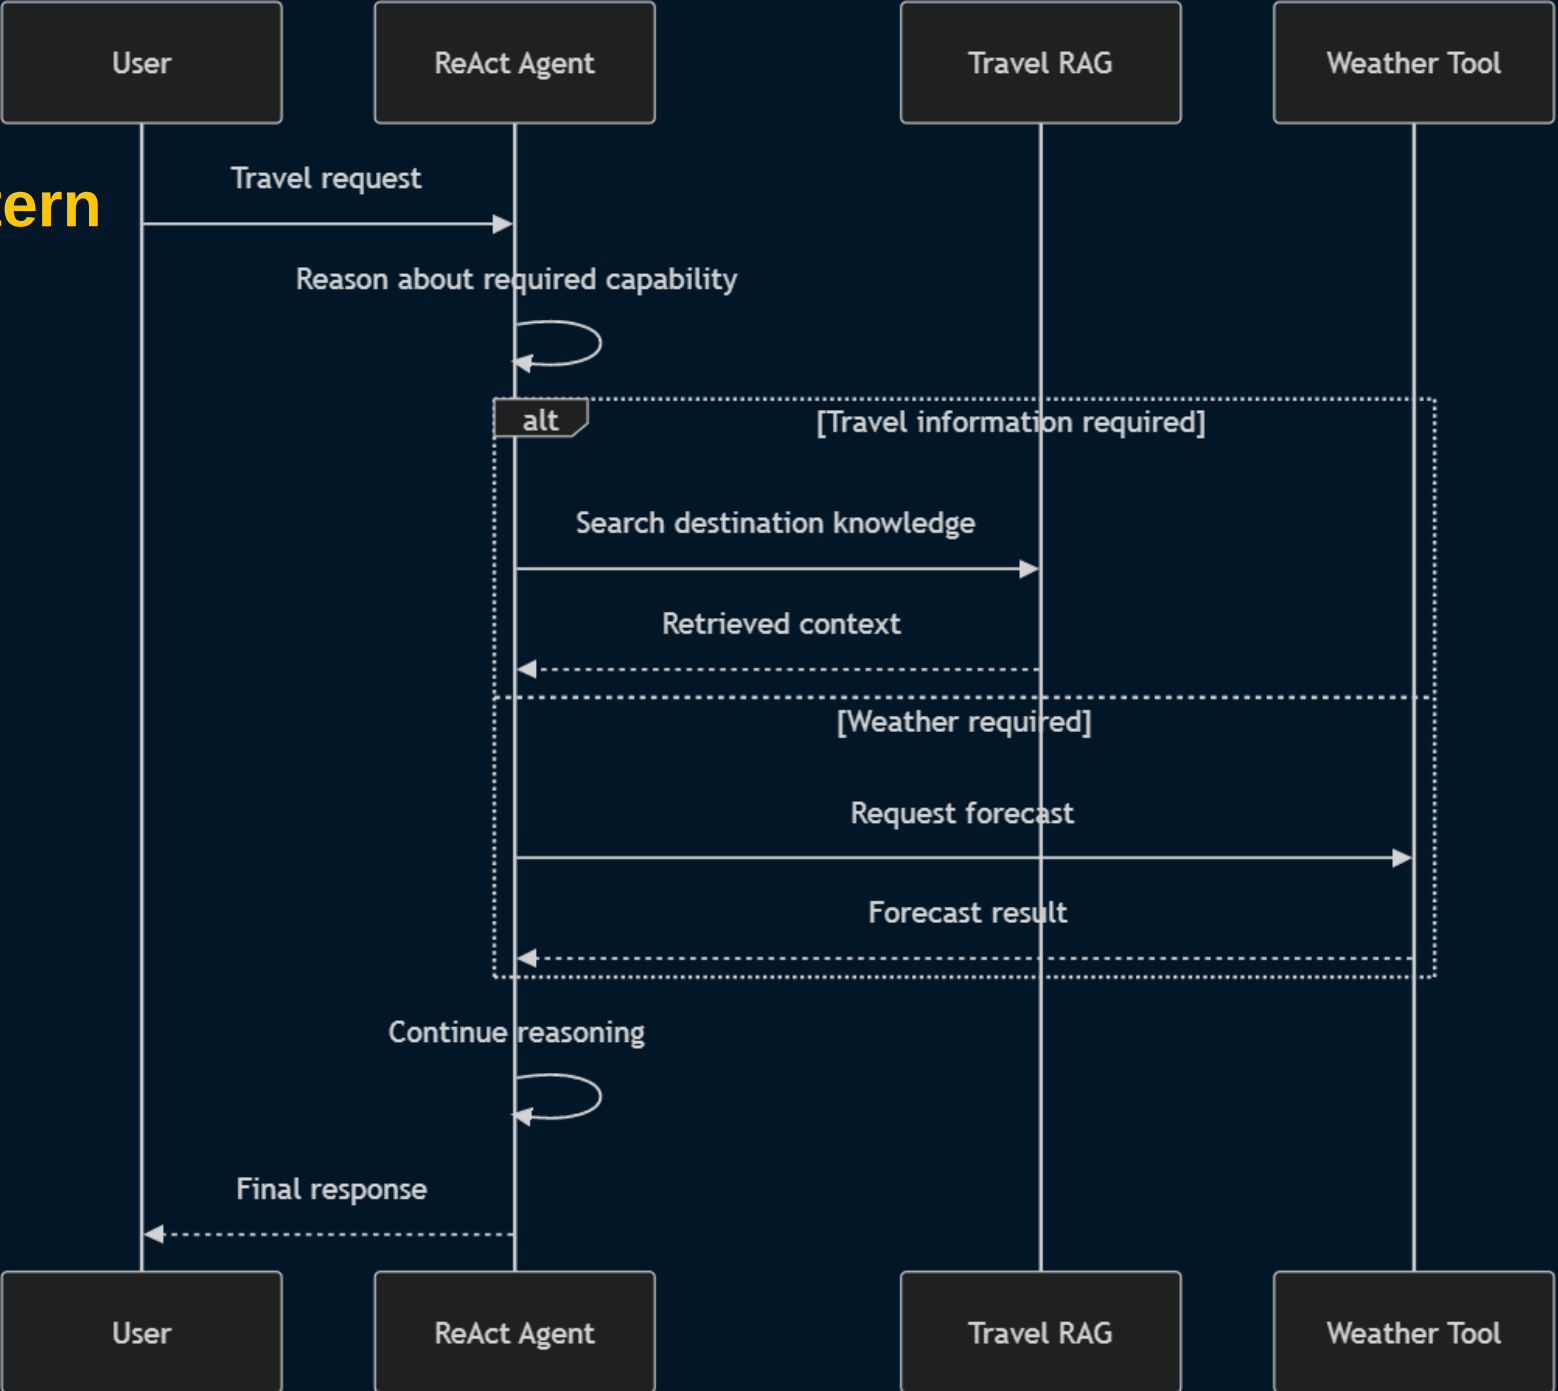

***LangGraph Prebuilt ReAct Agent
with
RAG and Multi-Tool Orchestration***

Max Montaseri

Architecture

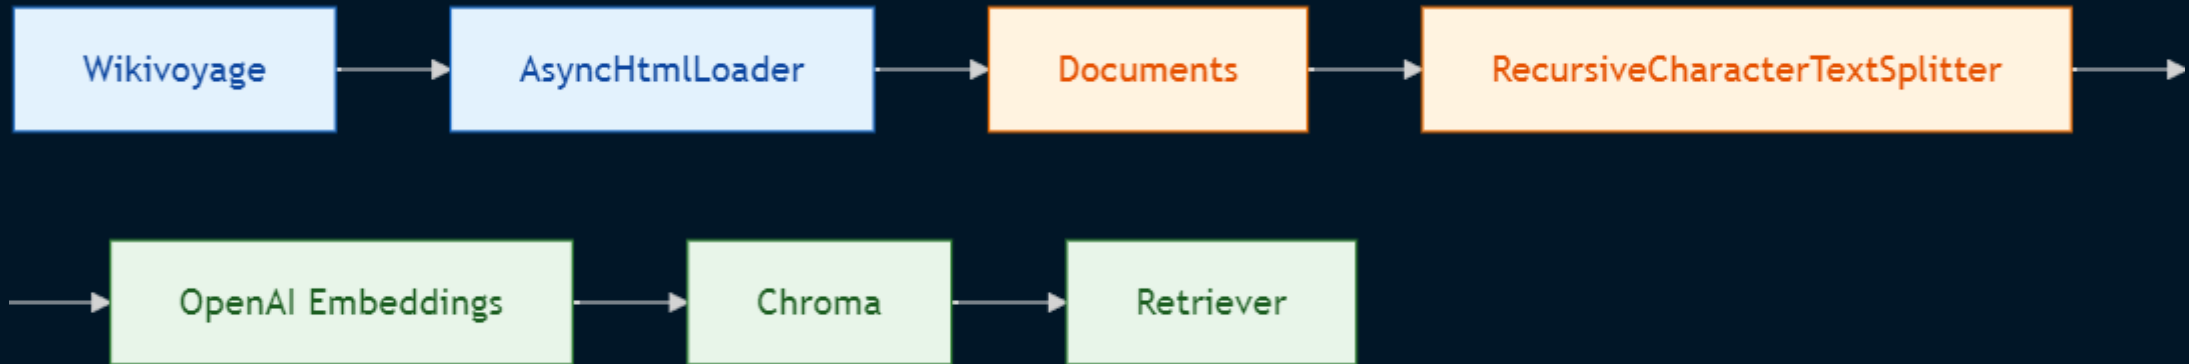

ReAct Agent Pattern

Travel Knowledge Base and RAG

The ingestion process

The application builds a travel knowledge base from Wikivoyage pages for:

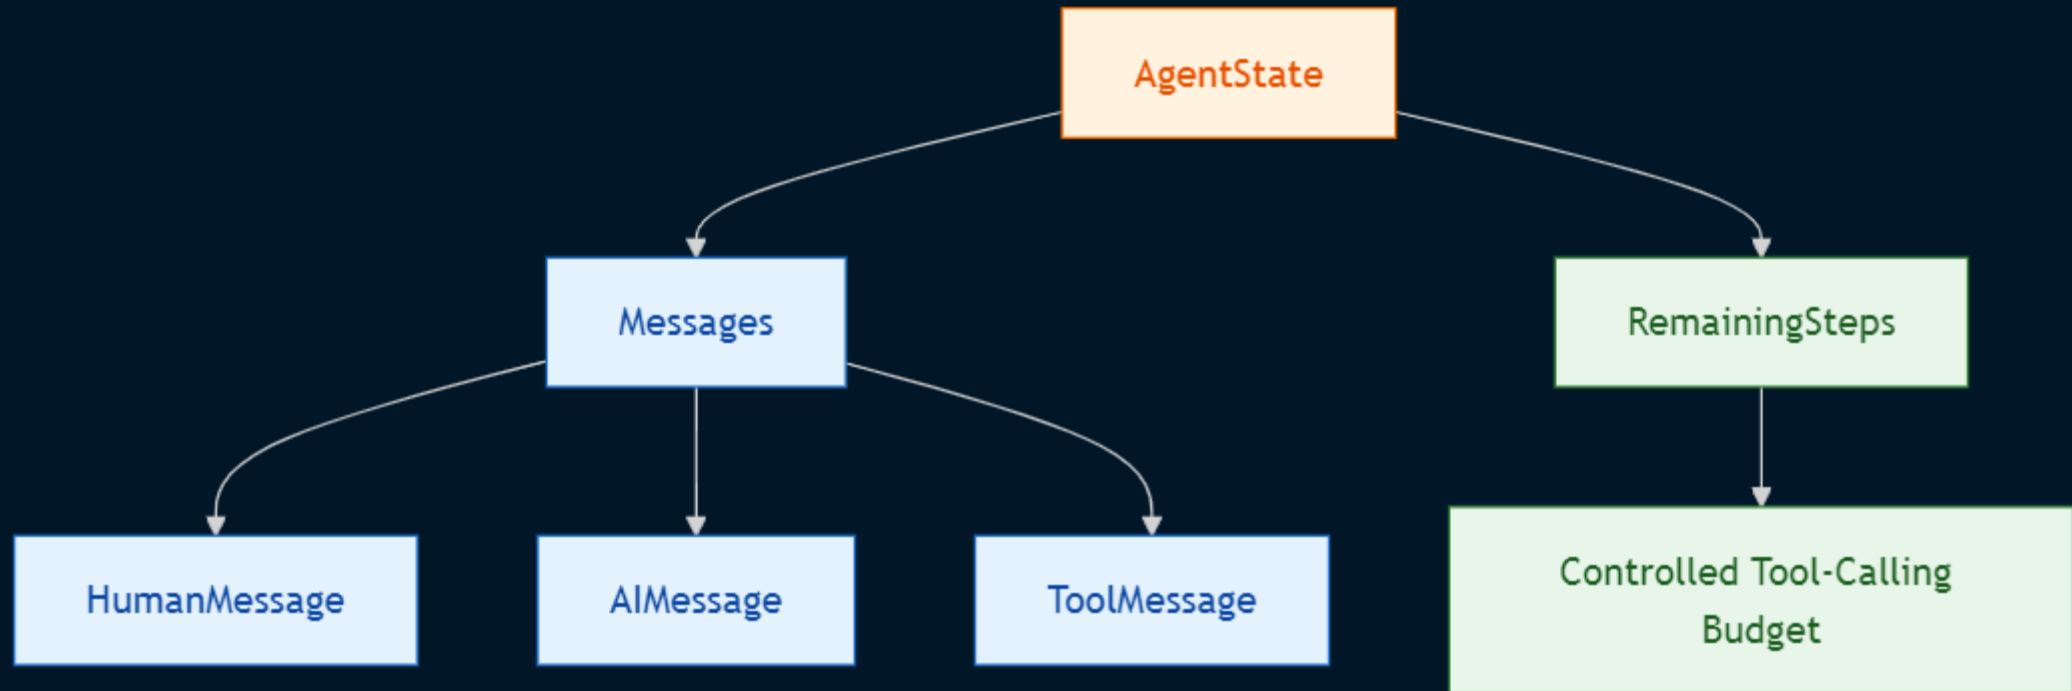

- Cornwall
- North Cornwall
- South Cornwall
- West Cornwall

Current Configuration

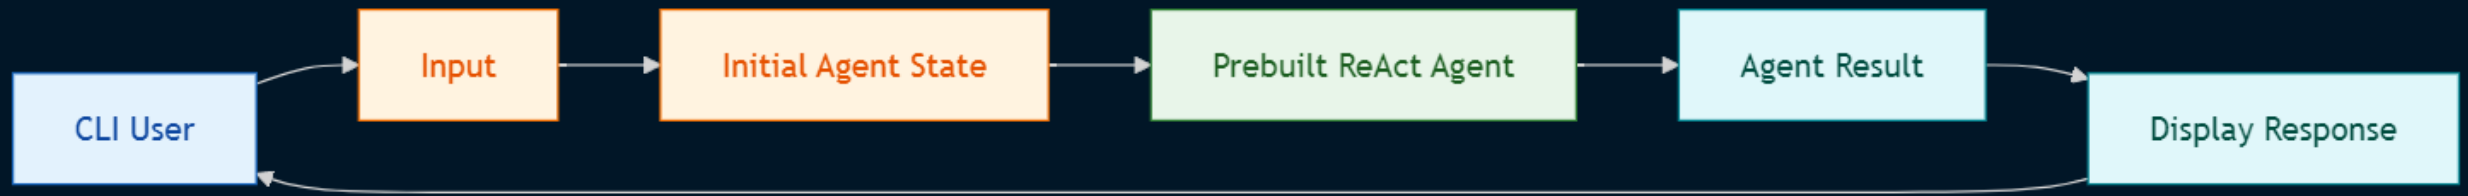

- Asynchronous HTML loading
- 1024-character chunks
- 128-character overlap
- OpenAI embeddings
- Chroma vector storage
- Retriever abstraction

The vector store is initialized through a cached module-level client.
